

Black Diamond – high performance alternative to asphalt emulsion (AE) and refined tar sealers (RTS).

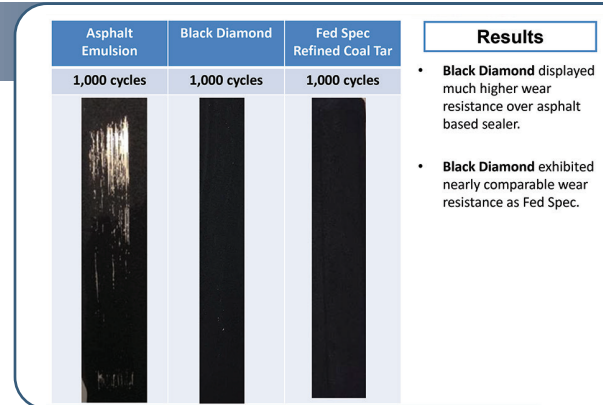

PRODUCT FEATURES & BENEFITS

- Durable – substantially better wear than AE products; similar wear to RTS
- Tougher – less power steering marks than AE and RTS products
- Temperature friendly – can apply in lower temps than AE; similar to RTS
- Color stable – will not gray out like AE products; **stays black!**
- Fuel resistant – meets ASTM and FAA fuel resistance standards
- Low odor – nearly zero VOC
- **Contains zero coal tar**
- Easy to apply – application is smooth and easy
- Seals out damaging effects of oil, vehicle fluids, and water; extends the life of asphalt pavement
- Formulated to protect all asphalt surfaces including commercial and residential parking areas/driveways

WEAR TEST COMPARISON

- **Wears 200% better than standard asphalt emulsion in lab tests**
- Wears similar to refined tar sealer
- Retains its deep black color, will not fade!

	Black Diamond	Asphalt Emulsion Sealer
Motor Oil	500 rubs	72 rubs
Gas	120 rubs	100 rubs
Brake Fluid	280 rubs	34 rubs
Antifreeze	500 rubs	350 rubs

• Chemical resistance was evaluated using ASTM D5402 modified for the listed chemicals.
 • Higher number of rubs denotes higher scrub & chemical resistance.

CHEMICAL TEST

- Certified by an independent lab to pass FAA P-630 for fuel resistance
- Standard asphalt emulsion does not meet this test!
- Greatly improves chemical resistance over standard asphalt emulsion sealer
